

# THE MAGIC OF ENERGY COLOURING PAGE

Here are a few ways you can help your house use energy better:

1. Use a clothesline on sunny days to dry your clothes—it's a simple, power-free way to do an everyday task.

2. Stay cool and use a ceiling fan instead of an air conditioner, or make sure your parents get an ENERGY STAR® air conditioner.

3. Always turn off electronics when you're not using them—like your TV, computer, and especially lights.

4. Shut the fridge when you're not grabbing something from it—it takes a lot of energy to keep your favourite foods chilled!
